

About: Aims & Scope

BITCOG Journal of AI & Data Science is an international, peer-reviewed scholarly journal aimed at pushing the boundaries of knowledge and innovation in AI and Data Science research. BITCOG Journal of AI & Data Science serves as a platform for academicians and researchers to share exemplary methodologies, research, and perspectives that help create a future for AI studies and its applications on societal fronts.

We invite high-quality, original, contributions on all areas of AI & Data Science, including but not limited to:

- Machine learning algorithms
- Data science, big data analysis and data mining
- Computer vision and pattern recognition
- Natural language processing
- Robotics and autonomous systems
- Ethical, legal, and societal implications of AI
- Data privacy and security in AI systems

Article Types

We accept submissions from the following categories:

Article type	Description
Research Paper	Original, primary research presenting novel methodologies, algorithms, or significant empirical findings.
Review Article	Comprehensive, critical, and authoritative surveys of the state-of-the-art in a specific field within the journal's scope.
Short Communication	Concise reports of significant new developments, techniques, or observations that warrant rapid publication.
Methodology Paper	Detailed description of new experimental methods, computational models, or data resources.

Peer Review

BITCOG Journal of AI & Data Science follows a double-blind peer review process.

- Preliminary assessment: all submissions are checked by the editorial office for scope alignment, originality, and adherence to basic quality standards before peer review.
- Peer review: after the preliminary assessment manuscripts are dispatched to a minimum of two independent expert reviewers. The authors and reviewers names are removed before manuscripts are dispatched to reviewers as the journal follows double-blind peer review.
- Decision: the editor-in-chief decides on the final acceptance of the manuscript based on the recommendations of reviewers.

Open Access

BITCOG Journal of AI & Data Science is an **Open Access** journal. All articles are freely available to the public immediately upon publication, promoting the widest possible dissemination of research. An Article Publishing Charge (APC) applies upon acceptance to cover publishing costs.

2. Ethics and Policies

Ethics in Publishing

BITCOG Journal of AI & Data Science adheres to the highest standards of publication ethics and authors are expected to present an accurate account of the work performed, an objective discussion of its significance, and to acknowledge the work of others. *Plagiarism, data fabrication, and redundant publications are strictly prohibited.*

Submission Declaration

- The work described has not been published previously (except in the form of an abstract, an academic thesis, or a published electronic preprint, as per the journal's policy).
- It is not under consideration for publication elsewhere.
- Its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out.

Authorship

- Authorship should be limited to those who have made a **significant contribution** to the conception, design, execution, data acquisition, analysis, or interpretation of the reported study.
- All those who have made significant contributions should be listed as co-authors.
- Other contributors who do not meet the criteria for authorship should be acknowledged in the "Acknowledgements" section.
- We encourage authors to include a **Credit (Contributor Roles Taxonomy)** statement detailing the individual contributions of each author.

Changes to Authorship

Authors are expected to provide a definitive list of authors at the time of original submission. Any addition, deletion, or rearrangement of author names must be made **before acceptance** and requires:

1. A written request from the Corresponding Author to the Editor-in-Chief.
2. The reason for the change.
3. Written confirmation (e.g., email or letter) from **all authors** (including the author being added or removed) that they agree with the change.

Declaration of Competing Interests

All authors must disclose any financial and personal relationships with other people or institutions that could inappropriately influence or bias their work. If there are no competing interests, authors should state: "The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper."

Funding Sources

Authors must identify all sources of financial support for the research and/or preparation of the article. This should include the names of funding organizations and grant numbers.

Declaration of Generative AI Use

Authors must transparently disclose the use of **Generative Artificial Intelligence (GenAI)** tools and Large Language Models (LLMs) in the creation of the manuscript.

- GenAI tools **cannot be listed as an author** as they cannot take responsibility for the published work.
- The use of GenAI should be acknowledged in the "Acknowledgements" section or a dedicated section at the end of the manuscript.
- Authors are solely responsible for the content of their work, including any part generated using AI tools, and must ensure proper fact-checking and originality.

Preprints

Authors are permitted to share their work on non-commercial preprint servers (e.g., arXiv, ResearchGate) before or concurrently with submission. Once the manuscript is accepted, authors should update the preprint record with a link to the final published article.

Use of Inclusive Language

Manuscripts should be written using inclusive language that acknowledges diversity, conveys respect to all people, and is sensitive to differences. Authors should avoid language that implies bias or stereotypes.

Reporting Sex and Gender-Based Analyses

When reporting on studies involving human subjects or data where sex and/or gender are relevant, authors must indicate the sex and/or gender of participants, the methods used to determine them, and discuss the relevance of these factors to the research findings.

Jurisdictional Claims

Authors should ensure that the manuscript does not contain statements that could be interpreted as a legal or jurisdictional claim.

Studies in Humans

All studies involving human participants or identifiable human data must include a statement that the study was approved by the appropriate institutional and/or national research ethics committee (including the name of the committee and reference number, if available) and that all participants provided informed consent.

3. Writing and Formatting

File Format

- Manuscripts must be submitted as a single Word document (.doc or .docx) or a LaTeX file (using the BITCOG Journal of AI & Data Science template, if available).
- **Do not use a double-column layout** for Word submissions. Use a single-column, double-spaced format with continuous page and line numbering.

Title Page

The title page must be a separate file or a separate section and should include:

- **Concise and informative title** (avoid abbreviations).
- **Full names and affiliations** of all authors.
- **The email address** of the Corresponding Author.
- **Credit statement** (optional but encouraged).

Abstract

A single paragraph of **up to 250 words** that briefly states the purpose of the research, the principal results, and major conclusions. It must be able to stand alone.

Keywords

Provide 3 to 8 relevant keywords immediately following the abstract.

Highlights

(Optional but encouraged) A set of 3 to 5 bullet points that convey the essence of the research and its significance. Each highlight should be no more than 85 characters long (including spaces).

Graphical Abstract

(Optional but encouraged) A single, compelling image that visually summarizes the core message of the article.

Math Formulae

- Equations should be numbered sequentially throughout the manuscript.
- Use an equation editor to create mathematical expressions.
- Ensure all symbols are defined.

Tables

- Tables should be numbered with Arabic numbers
- Each table must have a brief, descriptive title placed above the table.
- Use footnotes below the table to provide explanations or definitions.

Figures, Images and Artwork

- Figures should be numbered with Arabic numbers
- When adding figure caption place it below the figure/image/artwork
- Submit figures inside the manuscript file
- Attach high resolution files (typically JPEG, PNG, TIFF formats with 300 dpi for photographs and 600 dpi for artwork)

Generative AI and Figures, Images and Artwork

The use of AI in the manuscript is prohibited unless stated and acknowledged by the author for the purpose of language editing, image and artwork enhancement. Authors must state their adherence to this guide and ensure compliance with copyright issues.

Supplementary Material

Supplemental materials like datasets, detailed calculations, extended tables and figures can be submitted at the end of the manuscript.

Video

Authors can submit video files if they consider it relevant. The files should be submitted in common formats like MP4 or MOV.

Data Statement

Authors should declare data availability at the end of their manuscript as follows:

- “The supporting data for this manuscript are available from the corresponding author upon reasonable request.”
- “The supporting data for this manuscript are openly available in [repository name] at [DOI or URL].”

Co-submission of Related Data, Methods or Protocols

Authors should inform the editorial office if their manuscript is part of a series or is related to a simultaneously submitted data.

Article Structure

Articles submitted for publication should consider the following contents:

- Title page
- Abstract
- Keywords

- 1. Introduction: includes, but not limited to, research context, research gaps, and contribution.
- 2. Related works: includes literature review, empirical works, and models.
- 3. Materials and methods: detailed description of methods, data, and algorithms.
- 4. Results
- 5. Discussions: comparison of results with other related works.
- 6. Conclusion and recommendations for future research

- Acknowledgements (optional)
- Declaration of Generative AI use (if applied)
- Data availability statement
- Declaration of competing interests
- References
 - Apply IEEE referencing style
 - highly recommended using a reference management software (e.g., EndNote, Mendeley, Zotero) and including **Digital Object Identifiers (DOIs)** for all cited works.

1. Submitting Your Manuscript**Submission Checklist**

Before submitting, please ensure you have:

- Read and adhered to the Aims & Scope and all ethical policies.
- Included a concise, informative Title.
- Included the Abstract (max 250 words) and 3-8 Keywords.
- Clearly designated a Corresponding Author.
- Obtained permission for any previously published material.
- Included an explicit **Data Availability Statement**.
- Included a **Declaration of Competing Interests**.
- Disclosed any use of **Generative AI** tools.
- Ensured all figures and tables are cited in the text.
- Checked references for completeness and consistency.

Submit Online

Authors should submit their manuscripts via online submission button at <https://bitcogi.com/journal>. The corresponding author is responsible for the communication throughout the process.

5. After Receiving a Final Decision**Publishing Agreement and License Options**

If a manuscript is accepted for publication, the author should read and sign a publishing agreement to authorize the publisher rights to publish the article under a Creative Commons Access license.

Open Access

All published articles subject to Creative Commons Access license will immediately be publicly available for free.

Permission for Copyrighted Works

If you include tables, figures, or texts from copyrighted works, you should obtain permission from the copyright holder and cite the source in your manuscript.

Proof Correction

When articles pass the review and evaluation stage authors will receive an email that states their article is ready for proof reading. This process ensures typesetting, gramatical, and other minor errors are revised before publication.

Offprints

This journal is an open access and does not provide printed articles. A final PDF version of the published article will be attached to the author.

Responsible Sharing

Authors are encouraged to share their published article via websites, institutional repositories, research networks, and social media for wider readability.

6. Resources for Authors**Bitcog Learning**

Bitcog has a learning portal that offers both free and paid courses. Authors can access free resources on various topics including manuscript preparation, peer review, and publication ethics. Paid courses are also available for further capacity building of researchers and professionals.

Language and Editing Services

We provide professional language editing and writing services for authors. Authors can access those services by requesting the support center at <https://bitcogi.com/contact>. However, paid services are not prerequisite for acceptance or publication.

7. Getting Help and Support**Author Support**

If you encounter technical issues with the submission process, tracking manuscript, or general inquiries, you can contact the support team at <https://bitcogi.com/contact>.
